# THE EVEN COURSE OF JUSTICE! WOW!

KAMEHAMEHA THE GREAT—“Shade of Kaahumanu! What's Going on in The Old Courthouse?”

## MAY STOP SEWER WORK

Want of Funds Hinders  
Government.

## MUST QUIT OR BORROW

Material in Hand But Money Not  
Available to Pay the  
Labor.

The Government is in financial trouble. Its funds for the completion of the sewerage system are exhausted to such an extent that the Superintendent of Public Works, the contractors for the sewer, and the Board of Health held an important meeting yesterday afternoon. The situation is a grave one, and under the present circumstances it is unlikely that the sewers for Punchbowl district, the portion of the city above School street or Ewa of the Nuuanu stream can be completed unless the Government can borrow sufficient money to go on with the work. Unless further funds are available, all work on the sewers will come to an absolute standstill, and the city will be without proper sanitation.

Mr. McCandless states there is left in the available loan fund, \$204,266. Out of this, \$40,000 is needed for the completion of the Kalia pumping station, and making the last payment for the pump after it is started. It is estimated that \$2,000 for these and other items is necessary at once. This leaves \$162,266 for the sewer work.

Mr. Edwards made up an estimate yesterday morning of the \$279,000 for the completion of the system as mapped out for the entire city district. A second estimate of \$200,000 will complete the system along Punchbowl and above Liliha street. A third estimate of \$154,000 the business section alone can be completed to the outfall and put in running order. This means a practical cutting off of benefits to any part of Punchbowl slope, above School street into the valley or out to the bay.

The third estimate completes the Kewalo section also.

Dr. Wood stated his opinion on the matter before the Board of Health emphatically and in strong terms. "I want to emphasize the fact," said he, "that we need the sewer mostly in the thickly settled portions of Honolulu. Our late hardships in the plague epidemic were due to our own carelessness. We are already upon the very verge of a typhoid fever epidemic. It is increasing rapidly. We are depositing it in the ground every day and putting the germs into the cesspools. I want to say right here and now that there is nothing so important to the city of Honolulu at the present moment as the completion of this sewer system."

Mr. George W. Smith felt certain that if Honolulu thought another epidemic was imminent the Government could raise money here in Honolulu. He thought the present lack of sewers was progressing rapidly toward the epidemic stage, and that Honolulu would loan sufficient money to the Government to carry on the work until the legislature meets. It is anticipated that the legislature will relieve the Government of its financial embarrassments, and readily make a proper appropriation for all moneys expended on sewers. A motion was carried that the matter of the completion of the sewers be referred to a special committee to confer with other departments and develop ways and means to raise funds to complete the entire system.

It is estimated that along the water front \$19,500 will complete that portion of the work; \$15,700 the Makiki sec-

tion; \$12,000 the Kewalo district. The Government has purchased all the material for the entire district, but the lack of funds is in the matter of payment for labor. Dr. Wood, Dr. Cooper, George W. Smith and the entire board agree that the failure to complete the system will wreak serious injury to the city's health.

### STATISTICIAN NEEDED.

Board of Health Deplores the Lack  
of Such an Official.

The Board of Health is in receipt of sample sets of forms issued by the Bureau of Vital Statistics for the State of New York. The blanks for the record of marriages are very detailed and every detail of interest to the State Statistician is noted therein. Forms of other matters, births, deaths, etc., are treated in the same manner.

At the Board meeting yesterday afternoon the subject of having a Health Statistician in connection with the Health Department was brought up in conversation before the meeting and the lack of such an officer was deplored.

### Two Minor Criminal Cases.

The jury in the case of Frank Bartlett who was accused of reckless driving in running down a milk wagon failed to reach an agreement after being out for two hours. In the Madeiros case a verdict of not guilty was arrived at. Madeiros was accused of running down a young girl. It developed in the course of the trial that Madeiros had been engaged to the girl whom he was accused of running down and that he had broken off the engagement shortly before the prosecution had been begun.

## A GLOBE TROTTER WHO WORKS WAY

Carl Peterson Bakes His Pas-  
sage About the  
World.

Carl Peterson, a bright young man whose home is in Copenhagen, Denmark, was on board the Alameda yesterday bound for the Colonies. Mr. Peterson is working his way around the world. Starting from his home in May, 1899, he worked his way as a baker on one of the Atlantic liners to New York. He knew not a word of English, but he was a hustler and he was possessed of more than usual intelligence, and he was not long in finding a job.

He worked at his trade in New York and also in various parts of Massachusetts, picking up a little English each day until he was able to converse freely in the language. He was interested in the temperance cause and he used to write articles to the Copenhagen paper on the question, and after he had acquired a mastery of English he even delivered some addresses on the subject.

He stayed for nine months in the East, in different cities, and then in pursuit of his plan to circle the globe he made his way to San Francisco. There he stayed for a month securing employment at his trade, and when the Alameda sailed he was able to secure a position on her whereby he could make his way to the Colonies. He expects to spend a few months in Australia, will go thence to South Africa and hopes to reach his home in Copenhagen some time early next spring.

### IT SAVED HIS BABY.

"My baby was terribly sick with the diarrhoea," says J. H. Doak, of Williams, Oregon. "We were unable to cure him with the doctor's assistance, and as a last resort we tried Chamberlain's Colic, Cholera and Diarrhoea Remedy. I am happy to say it gave immediate relief and a complete cure." For sale by Benson, Smith & Co., Ltd., wholesale agents.

## COACH JUDD

Former Yale Man Trains  
Myrtles.Has High Hopes for the Hearties  
Now Hustling for Fall  
Honors.

James R. Judd, graduate of Yale class of '97, and who had the honor of feathering blade 7, starboard side, in the Freshman crew, is now coaching the Myrtle fours at the Peninsula for the races in September. Mr. Judd, whose home is in Honolulu, tried for the 'Varsity eight which was sent to Henley, England, but was thrown off, the last man to receive that disappointing honor. He is an authority on racing matters, his long service on the sliding seat among the sons of Eli teaching him many of the secrets of crew work which has so often sent the Yale shells to the fore.

Since his return to Honolulu Mr. Judd has taken unusual interest in the coming September races, and intends to put the Senior and Junior Myrtle crews through a physical and dietary regimen in return for which he predicts victory for the red and white pennant.

After having seen the practice work of both crews, Mr. Judd is of the opinion that very few of the oarsmen of Honolulu fully understand the American stroke. Mr. Klebahn, he says, knows the German stroke, of which he is a master. This year these two strokes will come in conflict, and the advantages of each will be determined by the final trial of strength on the race course.

On Tuesday evening, as coach, Mr. Judd stayed with the crews while they engaged in their evening practice. The crews are using as a boat house the residence of Clarence Macfarlane at the Peninsula. The training table is excellent and well supplied with edibles on liberal, modern ideas of diet. This is the first year the crews have been given coffee at breakfast. The water in which the rowing takes place is not bothered by wind, tide or waves, as is encountered on the Charles river or New Haven harbor. The course at the Peninsula is an excellent one for good rowing, says Mr. Judd.

The crews are becoming thoroughly interested in their training. "I saw the two crews row," said the coach yesterday. "They are going at it with the proper vim and determination. Of course they have many faults, as any crew will have. With three or four weeks training before the racing, and working on the same lines, they may hope to improve greatly in form by the 8th of September. Their plans seem to be to row the Yale stroke. In the Senior boat the body and slide work is fairly good. The men work well together and control their slides. The blade work is very ragged. They were held high out of the water on the catch and were not turned straight through the water at the same level. The crew did not take their blades out clearly at the finish. The result was the steady motion of the boat was interfered with. The boat when thus off its bottom was retarded in its progress."

"The Junior crew at first seemed a very beefy combination. The blade work, as such, did not exist, but they kept fairly good time, which is the first principle of rowing. The boat simply went along by brute strength. Watermanship is the main thing for both crews to learn."

Generally speaking the coach is very much elated over the material under his control, and feels that this year's racing will turn out some startling surprises.

### SLEPT OVER DUCK POND.

Oriental Genius Who Utilized Space  
Under His House.

Enterprising Orientals of Honolulu have the credit of thinking out some of the most ingenious schemes for making money. The palm in the last few weeks goes to one who but a short time since obtained a building permit

and erected a cottage on a small piece of land on the thoroughfare that leads to the Asylum. The house was put up, the sanitary inspector watched the operation and saw to it that everything was put in apple pie-order according to the health and building regulations.

Very often he passed along the road and each time took observations of the conditions prevailing there. One day the sun was beating down with unusual brilliancy and the inspector noticed a glare under the house, which is raised the required twenty inches above ground. He thought it rather a strange sight and that possibly a stream of water had overflowed and made a pond under the flooring. As he neared the house he heard the suggestive "Quack! Quack!" of a flock of ducks.

A closer investigation revealed a well-kept duck ranch and pond beneath the house. A deep hole had been dug for the owner's live stock and but for the inopportune visit of the sanitary inspector the Oriental would have been on the highroad toward making a fortune by his novel and landsaving method of raising ducks for market. The hole was filled up next day.

The author—"I wish I had time enough to write a good book." His friend—"Why not take it?" The author—"Can't afford to; I am too busy writing successful ones."—Life.

## Young Girls

How easy it is for young girls to go into the "decline." They eat less and less, become paler and paler and can hardly drag through the day. They are on the steady downward course. Iron does them no good; strychnine and biters all fail. They need a food that will nourish them better, and a medicine that will correct their disease.

## Scott's Emulsion

is both of these. elegantly and permanently combined. The Cod-Liver Oil makes the blood richer, and this gives better color to the face. The hypophosphates of lime and soda act as a strong tonic to the nerves. Soon the weight increases, the digestion improves and health returns.

At all druggists; 50c. and \$1.00  
SCOTT & BOWNE, Chemists, New York.
